DETAILED ACTION

1. After an intensive search and thorough examination of the present application claims 1-45 are found to be in condition of allowance.
2. The following is an examiner's statement of reasons for allowance: prior art teaches mobile terminals and radio communication devices that communicate with each other, where the communication device receives notification signals to notify a user of incoming calls. However, the prior art does not suggest or teach an instruction signal to the mobile telephone to make the mobile telephone respond to the caller by voice, further it does not teach establishing synchronization of transmitting-receiving operation by making intermittent communication with the mobile telephone by using the transmitter-receiver unit of the communication device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
